Infection & Quarantine Tracker

Identify the Population
Easily register people under observation or in voluntary/mandated quarantines.

Daily Checks
Participants receive automatic daily reminders and provide daily updates (with their smartphone).

Reports and Trends
Reports and dashboards are delivered to public health officials automatically.

Answer Public Questions
National resources are pre-loaded. Add your own local resources to provide information to your local service area.

Nation-Wide, Local Control
De-identified for national analytics. Local data under local control.
